FEATURES

▲ Reverse voltage up to 1200V.
▲ Operational beyond the -60°C to +230°C temperature range.
▲ Positive temperature coefficient for safe operation and ease paralleling.
▲ Extremely fast switching not dependent on temperature.
▲ Essentially no reverse or forward recovery.
▲ Ruggedized thru-hole packages.

APPLICATIONS

▲ Reliability-critical, Automotive, Aeronautics & Aerospace, Down-hole.
▲ Power converters, motor drives, switched-mode power supplies, power factor conversion.

DESCRIPTION

XTR1K1210 is 10A, 1200V 4H-SiC junction barrier Schottky diode able to reliably operate from -60°C to +230°C, with junction temperature able to reach +250°C. This diode has zero reverse recovery charge, which makes it ideally suited for high-frequency and high-efficiency power systems with minimum or no cooling requirements. XTR1K1210 has been designed to reduce system cost and ease adoption. The XTR1K1210 is available in ruggedized thru-hole packages.

Caution: Stresses beyond those listed in “ABSOLUTE MAXIMUM RATINGS” may cause permanent damage to the device. These are stress ratings only and functionality of the device at these or any other condition beyond those indicated in the operational sections of the specifications is not implied. Exposure to “ABSOLUTE MAXIMUM RATINGS” conditions for extended periods may permanently affect device reliability.
