

Grenoble, France, February, 2012, X-REL Semiconductor

X-REL Semiconductor press release 

For immediate distribution: Europe (including Russia) and USA

## **X-REL Semiconductor has signed a distribution agreement with MICROSS Components, UK, Ireland**

X-REL Semiconductor High-Reliability / High-Temperature Integrated Circuits expert, operating from -60°C to +230°C, announced the signing of a distribution agreement with MICROSS, a global provider for high reliability and state-of-the-art electronic applications which spans across space, military, industrial and Hi Rel markets, based in Alton Hampshire, United Kingdom.

This agreement combines X-REL Semiconductor and MICROSS' High reliability expertise and markets knowledge.

The distribution agreement between X-REL Semiconductor and MICROSS was done to enhance the sales in the UK territory. MICROSS already has a strong knowledge of the special customer environments and requirements: Hi Temp, vibration, shocks, which fits perfectly with X-REL collaboration expectations.

"Micross provides a knowledgeable sales team and their proven expertise will boost our presence in the UK territory" said Lydie Ferreira, marketing and partnerships manager at X-REL.

Detailed information can be reached under the web site:
